

JANANI HOSPITALS

Website Sitemap & WordPress Developer Specifications

Including WP Amelia Appointment Booking Integration

Prepared for WordPress Developer | 03/03/2026

1. Project Overview

This document provides the complete sitemap, page-by-page specifications, and technical integration details for the Janani Hospitals WordPress website. The site includes a fully automated appointment booking system powered by the WP Amelia plugin, with automated email confirmations sent to both patients and doctors upon booking completion.

Project Details	Technology Stack
Client: Janani Hospitals Website: jananihospitals.com Type: Hospital / Healthcare Total Pages: 15 Pages	CMS: WordPress (latest) Booking Plugin: WP Amelia Email: SMTP / WP Mail (Amelia) SEO Plugin: Yoast SEO / RankMath

2. Complete Site Structure

The website is organized into the following main sections. All pages should be accessible from the primary navigation menu unless marked as secondary pages.

#	Page Name	URL Slug	Nav Level
01	Home	/	Primary Nav
02	About Us	/about	Primary Nav
03	Departments & Specialities	/departments	Primary Nav
04	Our Doctors	/doctors	Primary Nav
05	Doctor Profile (Dynamic)	/doctors/[doctor-name]	Sub-page (auto)
06	Book an Appointment	/book-appointment	Primary Nav (CTA)
07	Appointment Confirmation	/appointment-confirmed	Auto-redirect (Amelia)
08	Services	/services	Primary Nav
09	Patient Information	/patient-information	Secondary Nav
10	Health Packages	/health-packages	Primary Nav
11	Gallery	/gallery	Secondary Nav

12	Blog / Health Tips	/blog	Secondary Nav
13	Careers	/careers	Footer Nav
14	Contact Us	/contact	Primary Nav
15	Privacy Policy / T&C	/privacy-policy	Footer Nav

3. Page-by-Page Specifications

Page 01 — Home

01	Home Page /	First impression of the hospital. Should be visually strong, trust-building, and guide visitors to book an appointment.
COMP.	▶ Hero Banner – Full-width with hospital tagline, CTA button: 'Book an Appointment' ▶ Quick Stats Bar – No. of Doctors, Specialities, Years of Experience, Patients Treated ▶ Featured Departments – Icon cards linking to /departments ▶ Why Choose Us – Trust indicators (24/7 Care, Experienced Doctors, Modern Equipment) ▶ Featured Doctors – Photo cards with name, speciality, and 'Book Now' button ▶ WP Amelia Widget – Embed short booking form on homepage (optional) ▶ Testimonials / Patient Reviews Slider ▶ Latest Blog / Health Tips Section ▶ Accreditations & Awards logos ▶ Emergency Contact Banner – Sticky or prominent display	
NOTE	Hero CTA button must link directly to /book-appointment page.	

Page 02 — About Us

02	About Us /about	Build trust and communicate the hospital's mission, vision, and history.
COMP.	▶ Hospital Story / History timeline ▶ Mission & Vision statements ▶ Core Values section ▶ Leadership & Management team with photos ▶ Infrastructure & Facilities highlights ▶ Accreditations, Certifications, Awards ▶ CTA block: 'Meet Our Doctors' linking to /doctors	

Page 03 — Departments & Specialities

03	Departments & Specialities /departments	Overview of all medical departments. Each department links to a filtered doctors list.
COMP.	▶ Grid/card layout for all departments (e.g. Cardiology, Orthopaedics, Gynaecology, Paediatrics, Neurology, General Surgery, etc.) ▶ Each card: Department Icon, Name, Short description, 'View Doctors' button ▶ 'View Doctors' filters /doctors page by department ▶ Department detail pages optional (expandable or separate subpage)	

NOTE Departments must be configured as 'Services' in WP Amelia so patients can select them during booking.

Page 04 — Our Doctors

04	Our Doctors <i>/doctors</i>	Searchable and filterable directory of all doctors. Each doctor links to a full profile page.
COMP.	▸ Search bar – Filter by doctor name or speciality ▸ Filter by Department dropdown ▸ Doctor card: Photo, Name, Designation, Speciality, Experience, 'Book Appointment' button ▸ 'Book Appointment' button pre-selects the doctor in Amelia booking widget ▸ Pagination or Load More	

Page 05 — Doctor Profile (Dynamic)

05	Doctor Profile <i>/doctors/[doctor-name]</i>	Individual profile page for each doctor. Dynamically generated. Must be synced with WP Amelia employee/doctor data.
COMP.	▸ Doctor Photo (large), Name, Designation, Qualifications ▸ Speciality & Sub-speciality ▸ Years of Experience ▸ Available Days & Timings (pulled from Amelia schedule) ▸ Education & Training ▸ Achievements / Publications (optional) ▸ Embedded Amelia Booking Widget — pre-filtered to this doctor ▸ Patient Reviews for this doctor (optional)	
NOTE	Amelia 'Employee' must be created for each doctor. Profile page embeds the <code>[ameliabooking employee=X]</code> shortcode.	

Page 06 — Book an Appointment ☐ (Key Automation Page)

06	Book an Appointment <i>/book-appointment</i>	Core automation page. Patients select Department, Doctor, Date & Time and complete booking. Automated emails sent via WP Amelia to both patient and doctor.
COMP.	▸ Step 1: Select Department / Speciality (Amelia 'Service Category') ▸ Step 2: Select Doctor (Amelia 'Employee' filtered by department) ▸ Step 3: Select Date from available calendar ▸ Step 4: Select Time Slot from available slots ▸ Step 5: Enter Patient Details (Name, Phone, Email, Reason for Visit) ▸ Step 6: Review & Confirm ▸ Booking Confirmation screen with appointment summary ▸ Automatic Email to Patient — Confirmation with date, time, doctor, location ▸ Automatic Email to Doctor — Notification with patient name, date, time, reason ▸ Optional: SMS notification (Amelia add-on)	
NOTE	Use Amelia shortcode: <code>[ameliabooking]</code> . Configure SMTP for reliable email delivery. Set up notification templates in Amelia > Notifications for both 'Customer' and 'Employee'.	

Page 07 — Appointment Confirmation

07	Appointment Confirmed <i>/appointment-confirmed</i>	Thank-you page shown after successful booking. Amelia redirects here automatically.
COMP.	▶ Confirmation message with booking summary ▶ Reminder: 'You will receive a confirmation email shortly' ▶ Add to Google Calendar button (Amelia feature) ▶ CTA: 'Book Another Appointment' and 'Return to Home'	
NOTE	<i>Set this URL in Amelia Settings > Redirect URL after booking. Amelia passes booking details via URL parameters.</i>	

Page 08 — Services

08	Services <i>/services</i>	Overview of all medical and diagnostic services offered by the hospital.
COMP.	▶ Service categories: Diagnostics, Radiology, Laboratory, ICU, Emergency, OPD, Surgeries ▶ Each service: icon, name, brief description ▶ CTA to Book Appointment for relevant services	

Page 09 — Patient Information

09	Patient Information <i>/patient-information</i>	Helpful information for patients visiting or admitted to the hospital.
COMP.	▶ OPD Timings ▶ Visiting Hours ▶ Admission & Discharge Process ▶ Insurance & TPA information ▶ FAQ section ▶ Patient Rights & Responsibilities	

Page 10 — Health Packages

10	Health Packages <i>/health-packages</i>	Preventive health check packages for individuals, couples, seniors, and corporates.
COMP.	▶ Package cards with name, included tests, price, target audience ▶ CTA: 'Book This Package' — links to /book-appointment with package pre-selected ▶ Corporate enquiry form	

Page 11 — Gallery

11	Gallery <i>/gallery</i>	Visual showcase of hospital facilities, departments, and events.
COMP.	▶ Filterable photo gallery (Facilities, Events, Team, Equipment) ▶ Lightbox view ▶ Video gallery section (optional)	

Page 12 — Blog / Health Tips

12	Blog / Health Tips <i>/blog</i>	Health education content to improve SEO and patient engagement.
COMP.	▶ Blog listing page with featured image, title, excerpt, date, category ▶ Categories: Nutrition, Wellness, Disease Awareness, Doctor Advice ▶ Single blog post page with related posts ▶ Author bio (linked to doctor profile if applicable) ▶ Search and filter	

Page 13 — Careers

13	Careers <i>/careers</i>	Job listings for medical and administrative staff.
COMP.	▶ Current openings list with job title, department, type (Full/Part-time) ▶ Application form or 'Apply Now' email link ▶ General CV submission option	

Page 14 — Contact Us

14	Contact Us <i>/contact</i>	All contact channels and location details.
COMP.	▶ Contact form (Name, Email, Phone, Department, Message) ▶ Phone numbers, Email addresses ▶ Hospital address with embedded Google Map ▶ Emergency hotline prominently displayed ▶ Department-wise contact directory ▶ Social media links	

Page 15 — Privacy Policy / Terms & Conditions

15	Privacy Policy / T&C <i>/privacy-policy</i>	Legal compliance page.
COMP.	▶ Patient data privacy policy ▶ Website terms of use ▶ Cookie policy ▶ Disclaimer	

4. WP Amelia — Booking Automation Specifications

WP Amelia is the appointment booking plugin that powers the full automation workflow. The following configurations are required to achieve automated email confirmations for both patients and doctors.

4.1 Initial Setup Checklist

Setup Item	Details / Action	Priority
Install WP Amelia	Install from WordPress Plugin Directory. Activate license key for Pro features (email notifications, custom fields).	CRITICAL
Configure SMTP	Install WP Mail SMTP plugin. Set up SMTP with Gmail/SendGrid/Mailchimp for reliable email delivery. Set 'From' name as Janani Hospitals.	CRITICAL
Add Employees (Doctors)	Create each doctor as an 'Employee' in Amelia. Include name, photo, email address, phone. Assign to relevant services.	CRITICAL
Add Services (Departments)	Create each department as a 'Service' in Amelia (e.g. Cardiology, Orthopaedics). Group under 'Service Categories'.	CRITICAL
Set Working Hours	For each doctor (employee), define available days and time slots under their working hours schedule.	HIGH
Add Locations	Add hospital location(s) in Amelia > Locations. Include address to display in email confirmation.	HIGH
Configure Notifications	Set up email notification templates in Amelia > Notifications for all relevant triggers.	CRITICAL
Custom Booking Fields	Add custom form fields: Reason for Visit, Patient Age, Insurance details.	MEDIUM
Confirmation Redirect	Set redirect URL to /appointment-confirmed in Amelia > Settings > General.	HIGH
Test End-to-End	Complete a test booking. Verify emails received by both test patient email and doctor email.	CRITICAL

4.2 Email Notification Setup

Navigate to: WP Admin > Amelia > Notifications. Configure the following notification types:

Notification Trigger	Recipient	Email Content to Include
Appointment Approved (Booking Confirmed)	Patient	Patient name, Doctor name, Department, Date, Time, Hospital Address, Cancellation link
Appointment Approved (Booking Confirmed)	Doctor / Employee	Patient name, Patient phone, Date, Time, Reason for Visit, Department
Appointment Pending	Patient	Booking received notice, pending confirmation by staff
Appointment Rejected / Cancelled	Patient	Cancellation reason, option to rebook link
Appointment Rescheduled	Patient	New date, new time, doctor name, confirmation details
Appointment Rescheduled	Doctor / Employee	New date, new time, patient details
Appointment Reminder (24 hrs before)	Patient	Reminder of upcoming appointment, doctor, time, location

4.3 Key Amelia Shortcodes

Use these shortcodes to embed the booking widget on the appropriate pages:

Shortcode	Use On Page	Description
[ameliabooking]	/book-appointment	Full booking form — all steps
[ameliabooking service=X]	/departments, /services	Pre-select department/service
[ameliabooking employee=X]	/doctors/[doctor-name]	Pre-select specific doctor
[ameliabooking category=X]	/health-packages	Pre-select package category
[ameliabooking step=1]	Homepage (mini widget)	Compact single-step form

5. Appointment Booking Flow (User Journey)

The following describes the end-to-end patient journey from landing on the site to receiving a booking confirmation email.

Step	Stage	Patient Action / System Action	Result
1	Discovery	Patient visits website homepage or /book-appointment directly via search/social media.	Lands on website
2	Select Service	Patient selects department or speciality from Amelia booking widget.	Department selected
3	Select Doctor	Patient browses available doctors for the selected department and selects preferred doctor.	Doctor selected
4	Select Date	Patient views available calendar dates for the selected doctor.	Date selected
5	Select Time Slot	Patient selects an available time slot for the chosen date.	Time slot selected
6	Enter Details	Patient fills in: Full Name, Phone, Email, Reason for Visit, any custom fields.	Form data entered
7	Confirm Booking	Patient reviews summary and clicks 'Confirm Appointment'.	Booking submitted
8	System: Save Booking	WP Amelia saves appointment to database, updates doctor's calendar.	Appointment saved
9	Email to Patient	Amelia sends automated confirmation email to patient with all appointment details.	Patient notified ✓
10	Email to Doctor	Amelia sends automated notification email to doctor with patient and booking details.	Doctor notified ✓
11	Redirect	Patient is redirected to /appointment-confirmed page with booking summary.	Journey complete

6. Recommended WordPress Plugins

Plugin	Purpose	Notes
WP Amelia (Pro)	Appointment Booking	Core booking & email automation plugin
WP Mail SMTP	Reliable Email Delivery	Required for Amelia emails to reach inbox
Yoast SEO / RankMath	Search Engine Optimization	Meta tags, sitemaps, schema markup
WP Rocket / LiteSpeed Cache	Performance & Caching	Improve page speed for better UX
Elementor / WPBakery	Page Builder	Visual layout of all pages
Contact Form 7 / WPForms	Contact & Enquiry Forms	For Contact Us and Careers pages
Smush / ShortPixel	Image Optimization	Compress doctor photos and gallery
UpdraftPlus	Backup	Regular automated website backups
Wordfence Security	Security	Firewall and malware scanning
WPML (optional)	Multi-language	If Tamil/Kannada language support needed

7. Developer Notes & Delivery Checklist

7.1 Important Requirements

- All doctor profiles must be added as 'Employees' in WP Amelia before the site goes live.
- SMTP must be tested and confirmed working before publishing the booking page.
- Email notification templates in Amelia must include all booking variables: patient name, doctor, date, time, location.
- Each department must be created as a 'Service Category' in Amelia for filtering to work on /doctors page.
- The /book-appointment page must be tested on mobile — majority of hospital bookings come from mobile users.
- Google Maps API key must be configured for the Contact page map embed.
- SSL certificate must be active (HTTPS) for form security and patient data protection.

7.2 Pre-Launch Checklist

- All 15 pages created and published
- WP Amelia configured: Services, Employees, Locations, Working Hours
- SMTP email delivery tested for both patient and doctor notifications
- Test booking completed end-to-end — patient email received, doctor email received
- Mobile responsiveness checked on all pages
- Page speed tested (Google PageSpeed Insights — target score 80+)
- SEO plugin configured with meta titles and descriptions for all pages
- Google Analytics / Search Console connected
- Contact forms tested
- SSL active — all pages loading on HTTPS
- 404 page customised

-
- Backup plugin configured and first backup taken
